EDUCATION

- **In Progress | SAYLANI MASS IT TRAINING**
MERN STACK DEVELOPMENT
- **Bachelor's In Software Engineering | University Of Karachi | Feb-21 – Mar-25**
GPA: 3.16
- **Intermediate | PECHS Education Foundation College | Aug-18 – Apr-20**
Percentage: 71.45 % (Pre Engineering)
- **Matric | Info English Grammar School | Apr-18**
Percentage: 80 % (Biology)

PROJECTS

- **HELPLYTICS AI**
Developed a responsive web application using React with user authentication features including login and signup. Implemented local storage for managing user data and session handling, along with sample data for demonstration purposes. Designed a clean, responsive and user-friendly interface using modern frontend technologies such as React, JavaScript, HTML and CSS.

GitHub Repository: <https://github.com/AnisUrRehmanFarooq123456/Helplytics-AI>

- **COUNTER APP**

Built a Counter App using React, deployed on Netlify for live hosting. The application demonstrates basic state management in React with interactive increment/decrement functionality. Developed using React, HTML, and CSS.

Hosted URL LINK: as-counter-app.netlify.app

- **DIGITAL CLOCK**

Developed a multi-function digital utility app using HTML, CSS, and JavaScript (ES6) that displays real-time current time, current date, and includes a stopwatch feature. The project focuses on DOM manipulation, time-based functions, and interactive UI with start/stop/reset controls for the stopwatch.

Hosted URL LINK: <https://anisurrehmanfarooq123456.github.io/AS-Digital-Clock/>

- **RAMADAN WEBSITE**

Developed a Ramadan-themed website using HTML, CSS and JavaScript, featuring real-time prayer timings fetched from an external API and a live countdown timer for remaining days until Eid. The project focuses on dynamic data rendering, DOM manipulation and a clean user interface to provide an engaging and informative experience.

Hosted URL LINK: <https://anisurrehmanfarooq123456.github.io/AS-Ramadan-Website/>

- **FOOD WEBSITE**

Developed a food website using HTML, CSS, and JavaScript (ES6) that fetches and displays food data dynamically from an external API. The application demonstrates modern JavaScript features such as ES6 syntax, async/await, and API handling, with clean UI rendering of food items and details. Focused on dynamic data fetching, responsive layout structure, and interactive user experience.

Hosted URL LINK: <https://anisurrehmanfarooq123456.github.io/AS-Food-Website/>

- **WEATHER APP**

Built a Weather App using HTML, CSS, and JavaScript (ES6) that fetches real-time global weather data from an external API. It displays live weather details like temperature, humidity, and conditions for any city.

Hosted URL LINK: <https://anisurrehmanfarooq123456.github.io/AS-Weather-App/>

CERTIFICATES AND ACHIEVEMENTS

- **HACKATHON PARTICIPATION | SAYLANI MASS IT TRAINING**

Built Helplytics AI using React with focus on authentication, local storage, and frontend development in a hackathon environment.

- **COMPLETED HTML, CSS & JAVASCRIPT | CISCO NETWORKING ACADEMY**

Gained foundational knowledge of web development using HTML, CSS, and JavaScript, including core concepts of responsive design and interactive web pages.

TECHNICAL SKILLS

- React.js
- TypeScript
- JavaScript (ES6+)
- HTML5
- CSS3
- Bootstrap
- GitHub
- MS Word, Excel, Tally etc.
